2021 Member Survey Results

49% of members surveyed came to AI-Anon because of a romantic partner's alcoholism/addiction, **14%** due to a parent's, and **19%** due to a child's.

CONCLUSIONS:

The method of collecting data from AI-Anon members yielded valid data that was reviewed by an outside vendor. Members saw an overall improvement in their quality of life through participation in AI-Anon; increased length of time in the program and outside treatment led to even greater improvement.

"Al-Anon saved my life. I crawled into my first meeting grasping for anything that would help me figure out and help my alcoholic loved ones. My life was out of control. The program and the members showed me another way to live, caring for myself, understanding addiction, learning about healthy behaviors, etc. I have found happiness and serenity despite hardships, whether the alcoholics are drin...see more

Facebook Post: How do alcoholics affect families?

Alcoholism is a family disease. Those closest to the alcoholic suffer the most.

I am so totally powerless over someone else's alcoholism - and that's okay

Distributing Al-Anon PSAs

Let it Begin with Me

“Service and recovery...are not independent of each other. Both are part of the spiritual awakening that continues to guide us. The more willing we become to practice all of this program, the more progress we can make in recovering from the effects of another’s alcoholism and in living our lives more fully.”
